

MYOB Premier v12

What's new in MYOB Premier v12?

Learn about the new features and improvements we've made since the release of MYOB Premier v11.

Email pay slips

Ensure employees receive their payslips quickly and conveniently.

Payroll leave management

Accurately pay, track and reporting on leave paid.

Employee security changes

Secure employee pay details from those not authorised to see them.

Itemised remittance advices and customer statements

Clarify amounts on remittance advices and customer statements.

Calculation of State payroll tax

Allow your business to calculate state payroll tax.

Print preview

Preview forms before they are printed or emailed.

Spell check

Helps make client invoices more professional.

Advanced search capability

Locate records in lists more quickly.

Tax table warnings and change of encryption

Ensure the latest tax scales are being used.

Prior year reporting of payroll data

Get easy access to payroll data from the previous year.

Saving of report filters and formatting

Get a true saving of custom reports and filters.

Invoices on statements as at statement date

Include only transactions up to and including the actual statement date on invoice statements.

Edit customer receipts and supplier payments

Improve businesses workflow around editing receipts and payments.

Eligible Termination Payment (ETP) summaries

Generate ETP payment summaries for terminated employees.

STS (Simplified Tax System) to SBE (Small Business Entity)

STS (Simplified Tax System) will now be referred to as **SBE (Small Business Entity)** – this terminology change has no impact on the product usability.

Reconciliation report for EMPDUPE and payroll data

Allow for easier reconciliation between the EMPDUPE file and payroll data.
