

MYOB RetailEnterprise v4

The multi-store reporting tool.

MYOB RetailEnterprise is a reporting tool for multiple stores, buying groups, retail co-operatives and franchise operators. It connects with any number of licensed MYOB RetailManager installations, giving you an overall view of outlets and the ability to streamline communications.

MYOB RetailEnterprise is simply a smarter way to run your business.

Generate reports for a consolidated retail operation – know your business

From Central module software at head office, get a snapshot of what's in stock and pinpoint the products that are selling and most profitable. Generate status reports of which stores have communicated with head office.

MYOB RetailEnterprise provides a central inventory database for all your stores, letting you easily review your operations performance, run reports and collect stock and supplier information from every shop.

Streamline communications

Manually create product updates by specifying a list of products that you want to send to your shops.

Make bulk price adjustments in just a few clicks for individual stores or all shops, and apply as a percentage of current price or expected gross profit.

Broadcast messages

Inform your stores of upcoming promotions, product updates, or any other urgent information via Shop module software that works in tandem with the shop's MYOB RetailManager system.

Broadcast messages immediately or for a scheduled time to either some or all of your shops. Versatile connection options include dial-up, local or wide-area networks or email. Inbuilt email facility means you don't need separate email software.

Better manage inventory

Classify stock into Departments and up to three-user-defined Categories such as Style, Colour and Size. View stock on hand between stores and work together to meet customer requests.

Ongoing support for your software

MYOB RetailEnterprise includes 12 months of phone fax and email Retail Technical Support, seven days a week. You will automatically receive any software upgrades, discounts and special offers that are released during this period.

On-site assistance from certified specialists

Get independent onsite assistance from MYOB's network of accredited retail specialists.

MYOB RetailManager Professionals can help with the installation, set up, implementation and maintenance of your MYOB RetailManager systems and Point-of-Sale hardware.
